

THEME PERFORMANCE CHECKLIST

Here's a list of things to double check to make sure your theme is performant. Re-read Lesson 12: Performance for clarification on any of these items.

- ☐ Total carousel count is zero
- ☐ Image background replaced with pure CSS where possible
- ☐ All images optimised losslessly with ImageOptim
- ☐ PNGs optimised further with ImageAlpha
- ☐ Assets concatenated where possible
- ☐ Assets minified where possible
- ☐ Lazy loading used for long pages with lots of images
